

HOTCOTE®

ELECTRIFIABLE COATED WIRE

STRAIGHT ATTACHING INSULATED BUCKLE*

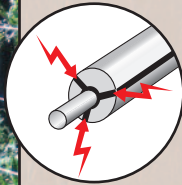

Use for straight pull, or on square posts or buildings.

HOTCOTE® ELECTRIFIABLE COATED WIRE

The highly conductive black carbon runs along the high tensile wire (see illustration) supplying the power from the fence energizer.

Available in Brown, Black and White (all with black stripes)

JOINING BUCKLE*

A quick, secure method to join coated wires without stripping or crimping.

HOTCOTE® INSULATOR*

It is a world-class design innovation for permanent installations of electrifiable coated wire. It's extremely strong.

A. OPTION: Tube insulators.

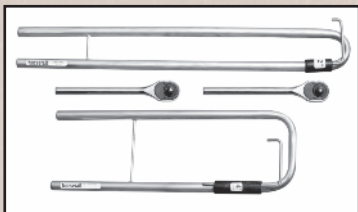

PRE-BENT 45° ATTACHING INSULATED BUCKLE*

Assists in alignment with line posts and reduces possible post rotation. For use on all end & gate posts.

OTHER ACCESSORIES:

Extended Handle Ratchets:

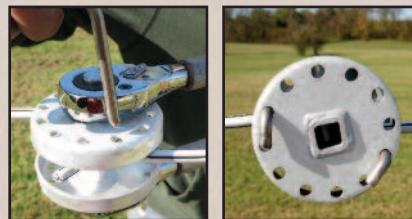

For a one person installation. After ratcheting to desired tension - you can "lean" on handles while inserting locking pins.

1/2" (12mm) Long Handle Ratchets:

Requires two people to tension fence. One to use ratchets and the other to insert locking pins.

Available in 24" (610mm) and 18" (457mm)

DONUT TENSIONER*

To complete tensioning of the fence - easily insert coated wire through Donut Tensioner holes. No need to strip the wire. Tension with the Extended Handle Ratchets for a one person install or use two 1/2" (12mm) Long Handle Ratchets. (see "Other Accessories")

*Double Coated for superior weather resistance – Hot Dipped Galvanized and Powder Coated. Available in

NOTE: We strongly suggest to apply electric fence warning stickers in strategic locations for safety purposes

OTHER PRODUCTS:

ELECTRIC LEADOUT WIRE

- For electrical hook-up
- Leadout from energizer to fence
- For undergate hookup, lightning arrester and cut-out switch

POLY PICKET

Allows greater post spacing (saves money)
Stops wire separation.
Available in white and black.

INSIDE CORNER ROLLER

Made of heavy duty materials for a long lasting, professional installed look!
For up to 90° on an inside corner.
Hot dipped galvanized.
